Product Description

Factory Price China Ford Mobile Ambulance Emergency Ford Ambulance Sale

Product features:

An ozone generator is used for sterilization in the negative pressure cabin to ensure that the germs in the medical cabin are completely eliminated. At the same time, ozone concentration monitoring is installed to prevent excessive ozone concentration from causing harm to the human body.

In terms of safety configuration, the ambulance is equipped with a striking warning system, including sirens, warning lights and flashing lights, to ensure that it can quickly attract attention in an emergency. Professional equipment such as 10L oxygen cylinders, ultraviolet disinfection lamps and automatic stretchers are all part of the standard configuration.

The interior design of the Ford ambulance focuses on practicality and comfort, such as the environmentally friendly floor assembly, polymer partition wall and ABS plastic one-piece interior roof, which provide a good working environment for medical staff.

Product advantages:

Directional airflow helps reduce contamination. The negative pressure compartment is designed using the principles of fluid mechanics to form a directional airflow from the clean area (medical staff area) to the infection source area (patient area), minimizing airflow dead corners and vortices.

High-efficiency filtration, disinfection and sterilization are also important features. The gas discharged from the negative pressure compartment is disinfected by a high-efficiency filter before being discharged, and the filtration rate of aerosols with a particle size of 0.3 microns exceeds 99.97%, ensuring that the discharged gas is safe and harmless.

The negative pressure system is equipped with an alarm device, which will automatically alarm when the negative pressure value is lower than the set value to ensure the normal operation of the system

Specification:

Main Specification	
Product Name	Automatic ambulance
Engine	2.3T 174PS L4
Max. power(kW)	128(174PS)
Max. torque (N-m)	430
Gearbox	6 speed manual
Overall Dimension(mm)	5498x2068x2485
Body structure	5 door 3 seater truck
Wheelbase(mm)	3300
Max. horsepower (Ps)	174
Max. power(kW)	128
Max. power speed (rpm)	3200
Max. torque (N-m)	430
Max. torque speed (rpm)	1400-2400
