Product Description

Ford Used Ambulance Parts Hospital Ambulance Vehicles Factory Direct Supply

Product features:

Equipped with a large-capacity oxygen cylinder, it can provide up to 20 hours of oxygen supply for long-distance transport (about 10 hours when using a ventilator)

The vehicle has sufficient power supply to support the operation of the ventilator, suction device, micro pump, and defibrillator monitor at the same time without affecting the normal driving of the vehicle

The platform space inside the vehicle is spacious and can accommodate a large number of monitoring equipment, providing solid protection for long-distance patient transportation.

The Ford ambulance infusion device is cleverly designed, with a hidden layout and equipped with an infusion hook and fixing straps. There is a companion chair and a single seat on the right side to facilitate the accompanying personnel. The car wall has been reinforced to have a stronger load-bearing capacity.

Product advantages:

Ford ambulance has better comfort and operation performance. It can easily pass through any complex road, has full power and better appearance.

The vehicle is equipped with professional external dressing supplies and sufficient bandages, which can be used to pre-treat wounds during transportation, effectively stop bleeding and prevent infection.

It is also equipped with advanced equipment such as stents, splints, portable ventilators, oxygen cylinders, and pacemaker defibrillators to ensure that the injured receive comprehensive care.

The walls, roof and floor on both sides of the car are made of fireproof, anti-slip, moisture-proof, anti-static, acid- and alkali-resistant polymer materials to ensure a safe and comfortable environment inside the car. Eye-catching reflective tape is attached to the waist and top of the car body to improve night driving safety

Specification:

Main Specification	
Product Name	Automatic ambulance
Engine	2.3T 174PS L4
Max. power(kW)	128(174PS)
Max. torque (N·m)	430
