

1000kg-10000kg Refrigeration Truck CLW5041XLCNJ6 Small Refrigerated Truck

Our Product Introduction

for more products please visit us on commercial-autos.com

Basic Information

- Place of Origin: henan
- Brand Name: Refrigerated Van
- Minimum Order Quantity: 1
- Price: Available for negotiation
- Packaging Details: Waxing in Bulk ship, Roro ship, Container
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

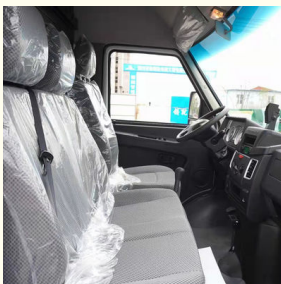

Product Specification

- Model: CLW5041XLCNJ6
- Transmission Type: Automatic
- Condition: New
- Horsepower: < 150hp
- Emission Standard: Euro 6
- Dimensions (L X W X H) (mm): 5995x2000x2800(mm)
- Box Dimensions (L X W X H) (mm): 3360x1640x1550(mm)
- Gross Vehicle Weight: ≤5T
- After-sales Service Provided: Video Technical Support, Online Support
- Maximum Torque(Nm): ≤500Nm
- Capacity (Load): 1-10T
- Engine Capacity: 4 - 6L
- Wheelbase: 3310mm

Product Description

Product features:

Sealing: In order to reduce heat exchange with the outside world, the container design of the refrigerated truck must ensure strict sealing.

Portability: Refrigerated trucks are usually used to transport items that are not easy to store for a long time. Therefore, despite the refrigeration equipment, they still need to be delivered to the destination quickly to keep the goods fresh.

Product usage:

A Refrigerator Truck is a temperature controlled vehicle designed for transporting chilled and frozen goods. It is equipped with advanced brakes, such as ABS, and a high-performance engine, typically fueled by diesel. It also features an insulated body made of foam, allowing it to maintain freezing temperatures during delivery. This makes it an ideal choice for transporting refrigerated goods, such as food and pharmaceutical products, over long distances. With its reliable and efficient performance, the Refrigerator Truck is an excellent choice for businesses that need to deliver goods that require temperature control.

Product advantages:

Safe transportation environment: Refrigerated trucks are equipped with temperature alarm systems, monitoring systems, etc., which can monitor the temperature and status of goods in real time. At the same time, they have shockproof and anti-skid functions to protect the goods from external impact and damage.

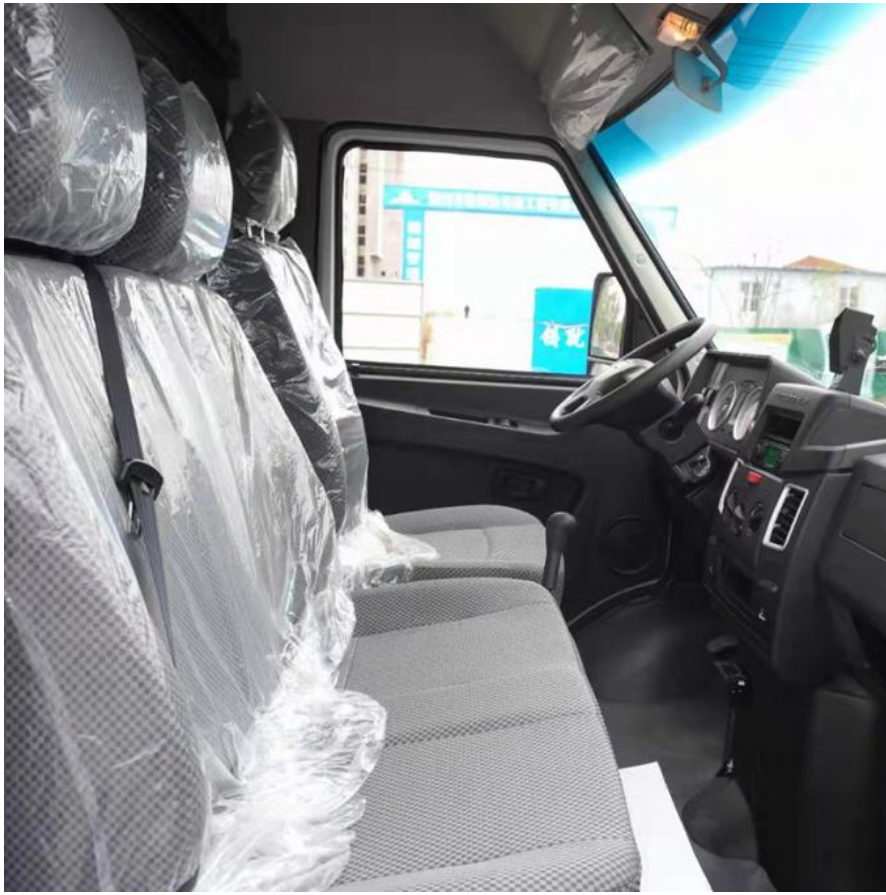

Efficient transportation efficiency: Refrigerated trucks use advanced refrigeration technology and energy-saving design, which can minimize energy consumption while ensuring the quality of goods.

Specification:

Vehicle Type	Refrigerated Van
Place of Origin	China
Tire specifications	195/75R16LT
Number of tires	6
Fuel type	diesel fuel
