Product Description

Product features:

Powerful power. As a medium or heavy commercial vehicle, the HOWO NX380 is equipped with a high-performance engine, usually with a large displacement and power output. Its power performance is sufficient to cope with various complex road conditions and transportation tasks, including long-distance transportation, heavy-load transportation, construction site operations, etc.

Product usage:

Engineering construction. In the field of engineering construction, the HOWO NX380 can also play an important role. Its powerful power system and sturdy body structure enable the vehicle to easily cope with various complex working conditions, such as earthwork transportation, construction material distribution, etc. At the same time, the vehicle's high passability and good off-road performance also make it perform well in complex terrains such as mountainous areas and construction sites.

Product advantages:

High cost performance. Although the Euro II emission standard is slightly behind the current international standard, in some specific markets or developing countries, the Euro II standard is still in line with local environmental regulations. Therefore, the right-hand drive Euro II version of the HOWO NX380 has certain advantages in price and can meet customers' pursuit of cost performance.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
