

52m Truck Mounted Concrete Boom Pump HOWO Concrete Pump Truck Diesel Power

Our Product Introduction

for more products please visit us on commercial-autos.com

Basic Information

- Place of Origin: Henan, China
- Brand Name: DongFeng
- Minimum Order Quantity: 1
- Price: Available for negotiation
- Packaging Details: Waxing in Bulk ship, Roro ship, Container
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

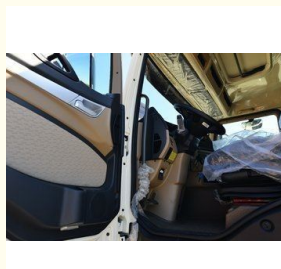

Product Specification

- Applicable Industries: Construction Works
- Showroom Location: None
- Condition: New
- Power Type: Diesel
- Weight: 18000 Kg
- Dimension(L*W*H): 2800 2500 3800
- Warranty: 1 Year
- UNIQUE SELLING POINT: Large Volume Pump System
- Max. Vertical Conveying Distance: 60M
- Max. Horizontal Conveying Distance: 50M
- Productivity: 20M³/H
- Machinery Test Report: Provided
- Video Outgoing-inspection: Provided
- Marketing Type: Hot Product 2019

Product Description

Diesel Power Type HOWO 52m Heavy Duty Concrete Pump Truck For Construction Works

Product features:

equipped with a long boom, in the range of activities can be arbitrarily change the position of the concrete pouring, 360 degree rotation without dead angle, do not need to lay pipelines on the site temporarily, can save auxiliary time, improve work efficiency.

High standard of safety and reliability.

High pumping efficiency.

Save time and manpower. The traditional method of concrete conveying requires a lot of manpower and takes longer time, while the concrete pump can quickly convey the concrete to the required location, which reduces the working period and improves the working efficiency.

Product usage:

Construction site :In large-scale residential construction projects, concrete pump trucks can efficiently transport concrete to high-rise construction parts to ensure construction progress and quality.

Bridge engineering:It plays an important role in the concrete pouring of bridge piers, box beams and other parts. Its long arm can span complex terrain and construction obstacles.

Road construction:Provide concrete for paving highways and urban roads to ensure the smoothness and strength of the road.

Participate in the concrete construction of road slope protection, retaining walls and other ancillary facilities.

Construction of industrial facilities:Provide concrete delivery services for the foundation and structural construction of large industrial buildings such as factories and warehouses.

Product advantages:

Improve the construction quality: concrete pump truck can realise the uniform delivery and pouring of concrete, avoiding the phenomenon of layering and misplacement of concrete, and improving the construction quality.

Wide range of application: concrete pump trucks are not restricted by terrain and landscape conditions, and can adapt to a variety of complex construction environments.

Cost reduction: concrete pump trucks can reduce construction time and labour costs, thus reducing construction costs.

Specification:

Overall length	8900
Overall width	2500
Overall height	3800
Self-weight	18000
Vertical height of boom	26
Boom horizontal length	21
Vertical depth of boom	19
Minimum spreading height	7.8
Emission standard	E6
Fuel tank volume	400
