Product Description

FAW 8*4 Dumper Truck New Tipper Trucks In Stock Automatic Unloading Construction Waste, Sand Gravel Transportation

Product features:

Dump trucks are mainly used to transport and clean up waste and debris generated in construction sites, road construction sites and other engineering projects, including soil, stones, concrete fragments, building material residues, etc. They have the characteristics of high load capacity, self-unloading function, strong adaptability, stable load and high efficiency and energy saving. They are an indispensable and important tool in the construction industry and earthwork projects.

Product advantages:

Strong load capacity: Dump trucks usually have a large load capacity and can effectively transport large amounts of soil and construction waste. **Self-unloading function:** Dump trucks are usually equipped with a self-unloading function, which can quickly unload goods and improve work efficiency. **Strong adaptability:** Dump trucks are suitable for various road conditions and construction environments, and can operate at different construction sites

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
