Basic Information

- Place of Origin: Hubei
- Brand Name: Dongfeng
- Minimum Order Quantity: 1
- Price: Available for negotiation
- Packaging Details: Waxing in Bulk ship, Roro ship, Container
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

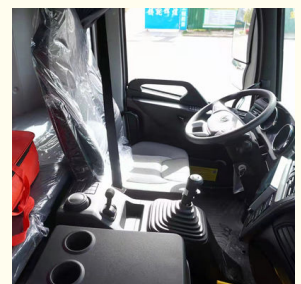

Product Specification

- Transmission Type: Manual
- Condition: New
- Horsepower: 150 - 250hp
- Emission Standard: EURO 5
- Fuel Type: Gasoline
- Dimensions (L X W X H) (mm): 9230*2500*3950
- Box Dimensions (L X W X H) (mm): 6800*2450*2600
- Gross Vehicle Weight: 10-15T
- After-sales Service Provided: Video Technical Support, Online Support
- Maximum Torque(Nm): 2000-2500Nm
- Capacity (Load): 11 - 20T
- Engine Capacity: 4 - 6L
- Wheelbase: 5250mm

Product Description

Product features:

Refrigeration system: Refrigerated trucks are equipped with refrigeration units that can provide continuous refrigeration to maintain the interior of the car in a specific low-temperature environment. They are suitable for transporting frozen foods, dairy products, vegetables and fruits, vaccines and medicines, and other goods that need to be stored at low temperatures.
Sealing: In order to reduce heat exchange with the outside world, the container design of the refrigerated truck must ensure strict sealing.

Product usage:

A Refrigerator Truck is a temperature controlled vehicle designed for transporting chilled and frozen goods. It is equipped with advanced brakes, such as ABS, and a high-performance engine, typically fueled by diesel. It also features an insulated body made of foam, allowing it to maintain freezing temperatures during delivery. This makes it an ideal choice for transporting refrigerated goods, such as food and pharmaceutical products, over long distances. With its reliable and efficient performance, the Refrigerator Truck is an excellent choice for businesses that need to deliver goods that require temperature control.

Product advantages:

Refrigeration system: Refrigerated trucks are equipped with refrigeration units that can provide continuous refrigeration to maintain the interior of the car in a specific low-temperature environment. They are suitable for transporting frozen foods, dairy products, vegetables and fruits, vaccines and medicines, and other goods that need to be stored at low temperatures.
Sealing: In order to reduce heat exchange with the outside world, the container design of the refrigerated truck must ensure strict sealing.
