Product Description

New Multi-Functional Emergency Ambulance Brand New FORD Transport Monitoring ICU Ambulance Vehicle

Product features:

An observation window is designed at the rear of the cockpit so that the driver and medical staff can observe the situation behind and deal with emergencies in time

Below the observation window is a simple operating table where some medical treatments can be performed. There is also a communication device through which the medical staff behind the scenes can communicate with the doctor to ensure that the patient is treated in the shortest possible time.

Below the observation window is a simple operating table where some medical treatments can be performed. There is also a communication device through which the medical staff behind the scenes can communicate with the doctor to ensure that the patient is treated in the shortest possible time.

Product advantages:

The Ford Transit ambulance dashboard is simple and clear, with the speed, speed, water temperature, fuel tank, and mileage displayed at a glance, and a thoughtful reminder of the remaining mileage of fuel consumption. Even at night, the black-and-white scale values and the ice-blue instrument pointer provide a perfect display effect.

This ambulance ensures safe driving and is equipped with dual airbags, which is rare in commercial vehicles. Even if you are sitting in the passenger seat, you can still be assured of protection in the event of a sudden emergency.

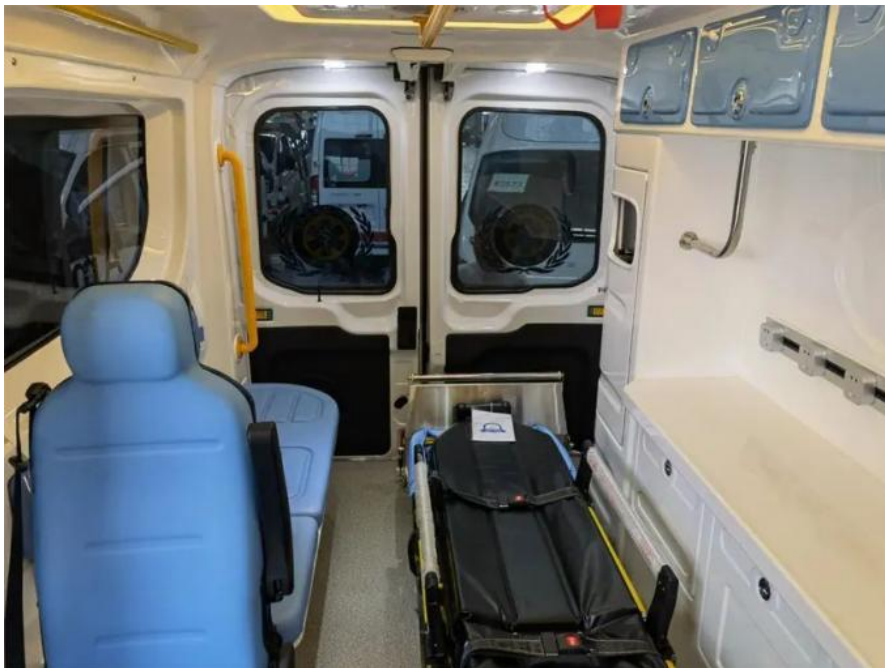

The interior decoration of the medical cabin and the medical cabinets are all made of one-piece molding technology, with beautiful and high-end appearance, practical functions, smooth surface, waterproof, anti-corrosion, mildew-proof, flame retardant, antibacterial, easy to clean and many other advantages. The whole vehicle is equipped with high-end vehicle stretcher, audio and video monitoring, intelligent vehicle management system, pre-hospital intelligent emergency system, etc
