

First Aid FORD Ambulance Diesel Medical Equipment Ambulance Vehicle

Our Product Introduction

for more products please visit us on commercial-autos.com

Basic Information

- Place of Origin: Henan, China
- Brand Name: FORD
- Minimum Order Quantity: 1
- Price: Available for negotiation
- Packaging Details: Waxing in Bulk ship, Roro ship, Container
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

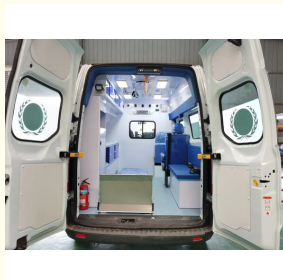

Product Specification

- Medical Equipment: Yes
- Transmission Type: Automatic
- Condition: New
- Fuel Type: Diesel
- Length (m): 3 - 8m
- Highlight: **First Aid FORD Ambulance, FORD Ambulance Diesel, Medical Equipment Ambulance Vehicle**

Product Description

2024 New Design FORD Emergency Ambulance Car For First-Aid Medical Equipment Ambulance

Product features:

The uniqueness of Ford's new Transit negative pressure ambulance lies in its use of negative pressure technology; that is, when the air pressure inside the car drops to a certain level, gas will be discharged. The air pressure inside the car is reduced to a level lower than that of the surrounding atmosphere; therefore, in the case of free flow, the air outside the car must be guided into the car to ensure the safety of its flow.

In addition, negative pressure technology can effectively treat the air in the car to ensure that it is safely discharged, reduce the risk of virus or bacteria attack on people in the car, and thus improve the safety of medical staff themselves. Prevent more people from being infected and reduce the possibility of medical staff being infected

When treating and transporting special diseases such as infectious diseases, the risk of cross infection among medical staff can be minimized; it also reduces the physical damage caused by long working hours for medical staff. The carriage is also equipped with corresponding equipment; a full set of rescue equipment, including defibrillators, ECG monitors, etc., can be used for emergency treatment; an ultraviolet disinfection device is installed; and a central interface for oxygen is provided.

Product advantages:

The cab is equipped with two seats, and the rear is a spacious rescue cabin. The right side of the medical cabin is designed with a sliding door, and the windows are also covered with explosion-proof film. In addition to some standard medical configurations, users can add some medical equipment according to actual needs.

The driver and medical cabins are both equipped with factory air conditioners, and with the exhaust system, they can provide the most suitable riding environment for patients no matter how hot or cold the outside environment is.

The medical cabin is equipped with LED lighting and ultraviolet disinfection lamps to provide a good lighting environment for medical staff to accurately rescue patients. The ultraviolet disinfection lamp is also exclusive to ambulances, and its purpose is to disinfect bacteria in the car. Considering the power demand, the car is equipped with a central power distribution system, and various charging ports can well meet the power demand of medical equipment.

Specification:

Main Specification	
Product Name	Automatic ambulance
Engine	2.3T 174PS L4
Max. power(kW)	128(174PS)
Max. torque (N-m)	430
Gearbox	6 speed manual
Overall Dimension(mm)	5498x2068x2485
Body structure	5 door 3 seater truck
Wheelbase(mm)	3300
Max. horsepower (Ps)	174
Max. power(kW)	128
Max. power speed (rpm)	3200
Max. torque (N-m)	430
Max. torque speed (rpm)	1400-2400
