

## 351HP - 450HP Howo 8x4 Dump Truck High Horsepower Sinotruk Howo 8x4

Our Product Introduction

for more products please visit us on [commercial-autos.com](http://commercial-autos.com)

### Basic Information

- Place of Origin: Henan, China
- Brand Name: SINOTRUCK
- Minimum Order Quantity: 1
- Price: Available for negotiation
- Packaging Details: Waxing in Bulk ship, Roro ship, Container
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

### Product Specification

- Condition: New
- Steering: Left
- Horsepower: 351 - 450hp
- Emission Standard: Euro 2
- Segement: Heavy Truck
- Market Segement: Urban Construction Muck Transportation
- Engine Brand: WEICHAI
- Fuel Type: Diesel
- Engine Capacity: > 8L
- Cylinders: 6
- Gear Box Brand: SINOTRUCK
- Transmission Type: Manual
- Forward Shift Number: 10
- Reverse Shift Number: 2
- Maximum Torque(Nm): 1000-1500Nm

## Product Description

Heavy Duty 8x4 HOWO Dump Truck With 4.2m Cargo Tank Length And High Horsepower

### Product features:

Right-hand drive design. The right-hand drive version of HOWO NX380 is designed for countries and regions with left-hand traffic, such as the United Kingdom, Australia, New Zealand, Japan, and some African and Southeast Asian countries. This design allows the driver to sit on the right side of the vehicle, making it easier to observe vehicles and pedestrians on the left, in line with local traffic rules and driving habits.

Euro II emission standards. The Euro II emission standards refer to the second stage of European automobile exhaust emissions, which mainly limit the emissions of carbon monoxide (CO), hydrocarbons (HC), nitrogen oxides (NOx) and particulate matter (PM). Although the Euro II standard is relatively loose compared to the current stricter emission standards (such as Euro VI and National VI), it is still a feasible environmental protection requirement in some developing countries or regions. The right-hand drive Euro II version of HOWO NX380 meets the regulatory requirements for vehicle emissions in these regions.

### Product usage:

Logistics and transportation. The right-hand drive Euro II version of the HOWO NX380 has a wide range of application prospects in the field of logistics and transportation. Whether it is urban distribution, long-distance freight or cold chain logistics, this model can meet the diverse needs of logistics companies with its excellent power performance, carrying capacity and durability. Especially in some countries with left-hand traffic rules, this model has become the first choice for logistics and transportation.

Engineering construction. In the field of engineering construction, the HOWO NX380 can also play an important role. Its powerful power system and sturdy body structure enable the vehicle to easily cope with various complex working conditions, such as earthwork transportation, construction material distribution, etc. At the same time, the vehicle's high passability and good off-road performance also make it perform well in complex terrains such as mountainous areas and construction sites.

### Product advantages:

Comply with local laws and regulations. The right-hand drive Euro II version of the HOWO NX380 strictly complies with local laws and regulations, and meets local standards in terms of driving habits and emission standards. This makes the vehicle more competitive in the local market and can quickly occupy market share.

High cost performance. Although the Euro II emission standard is slightly behind the current international standard, in some specific markets or developing countries, the Euro II standard is still in line with local environmental regulations. Therefore, the right-hand drive Euro II version of the HOWO NX380 has certain advantages in price and can meet customers' pursuit of cost performance.

### After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

### Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

### Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.

### Specification:

Condition	New
Horsepower	351 - 450hp
Emission Standard	Euro 2
Market Segement	Engineering transportation
Gross Vehicle Weight	20-25T
Drive Wheel	6x4

After-sales Service Provided

Video technical support, Online support
