Product Description

Product features:

Equipped with adjustable towing device, it can adapt to the towing requirements of different car models with high versatility. Installed with efficient lighting system, including headlights and body auxiliary lighting, to ensure a clear line of sight for night rescue.

The vehicle adopts humanized design, with comfortable driving seat and reasonable layout of operation buttons to reduce the fatigue of rescue personnel.

Equipped with perfect communication equipment, it can maintain real-time contact with the command center, maintenance workshop, etc. and obtain rescue guidance.

Product usage:

Used for vehicle rescue on busy urban roads to quickly solve traffic jams caused by vehicle failures.

Rescue faulty vehicles in remote areas, keep in touch with the outside world through communication equipment and get support.

Assist insurance companies to deal with accidental vehicles and safely transfer damaged vehicles to designated locations.

Product advantages:

Adjustable traction device and wide applicability enable the rescue vehicle to cope with various rescue scenarios.

Good lighting and humanized design enhance the safety of rescue at night and the working comfort of rescuers.

Perfect communication equipment ensures that the rescue operation is guided in time and improves the rescue success rate.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
