Product Description

Product features:

The body is made of high-strength steel, which is sturdy and durable, and can withstand the heavy pressure of garbage and the wear and tear of long-term use, prolonging the service life of the vehicle.

The internal design of the loading compartment is reasonable and the tilting angle is ergonomic, which is convenient for garbage dumping and reduces residue.

Equipped with advanced intelligent control system, it can monitor the vehicle operation status and garbage loading volume in real time, which is convenient for operation and management.

Installed with clear operation instruction signs and warning lights to improve operation safety and remind the surrounding personnel to pay attention to safety.

Product usage:

In large residential districts, centralized collection of all kinds of daily living garbage produced by residents, to protect the beautiful environment of the district.

Applicable to schools, hospitals and other public places, timely cleanup of garbage, to prevent the spread of germs, to maintain public health and safety.

It can be used in urban construction sites, to deal with construction waste, to ensure that the construction site is neat and orderly.

Product advantages:

Sturdy body structure reduces maintenance frequency, saves maintenance cost and improves equipment reliability.

Reasonable loading compartment design and intelligent control system enhance operational efficiency and facilitate management.

Perfect safety facilities safeguard the safety of operators and surrounding people and reduce accidents.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.
