Product Description

Product features:

With flexible maneuvering performance and small turning radius, it can travel freely in narrow streets and alleys, which is convenient for garbage collection.

Adopting advanced garbage compression technology with high compression ratio, it can reduce the volume of garbage significantly and improve the transportation efficiency.

The vehicle's garbage entrance is humanized in design, with moderate height and width, which is convenient for garbage can docking and improves loading speed.

Efficient deodorization and sewage treatment devices are installed to reduce odor and sewage pollution to the environment and realize environmentally friendly operation.

Product usage:

Commonly used in the old urban areas of the city, weaving through narrow streets and hutongs to collect residents' living garbage.

In commercial pedestrian streets, clean up the garbage produced by merchants and tourists in time to maintain the commercial atmosphere.

Suitable for rural areas, collecting scattered rural living garbage and improving rural environmental health.

Product advantages:

Flexible operation performance adapts to the complex road environment and improves the coverage of garbage collection.

High compression ratio and humanized design improves operational efficiency and reduces transportation cost.

Efficient environmental protection device effectively reduces pollution and protects the environment, in line with the concept of green development.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
