Product Description

Product features:

Adopting quantum dot solar panel with high photovoltaic conversion efficiency, it can provide some power support even in cloudy days.

The running track of the compression mechanism of the refuse collection station is optimised for smooth movement, reducing lagging and improving compression efficiency.

The mobile chassis adopts hydraulic suspension lifting system, which can adjust the height of the equipment and adapt to different clearing vehicles.

Product usage:

Applied in the city environmental protection education base, displaying advanced technology, publicising environmental protection knowledge and dealing with base rubbish.

In the city remote mountainous tourist attractions, using solar energy continuous power supply, clean up tourists' rubbish.

Used in urban sanitation scientific research project site, as a test platform, to promote technological innovation.

Product advantages:

Quantum dot battery improves energy use, energy saving and environmental protection.

Optimised compression trajectory improves efficiency and stable operation.

Hydraulic suspension adapts to the vehicle, optimising the transfer process.
