## Product Description

### Product features:

The ventilation system of the dump station adopts negative pressure design to force out odour, avoiding odour spillage and guaranteeing fresh air in the surrounding.

Adopting high-strength rubbish loading and unloading chain, which is durable and can withstand the pulling and pulling of heavy-loaded rubbish and is not easy to break.

The body is made of lightweight aluminium alloy frame, which reduces the weight under the premise of ensuring strength and is easy to move.

### Product usage:

Commonly used in urban residential densely populated areas, such as large community centres, to deal with massive amounts of domestic waste.

In the vicinity of hospital outpatient buildings and inpatient departments, to collect medical waste packaging to prevent the spread of germs.

Used in the core area of urban tourist attractions to maintain the quality environment of scenic spots and attract tourists.

### Product advantages:

Negative pressure ventilation effectively removes odour and improves residents' living comfort.

High-quality loading and unloading chain ensures safe and efficient rubbish loading and unloading.

Lightweight frame reduces energy consumption and improves mobility.
