## Product Description

### Product features:

The bottom of the storage bin of the refuse station is designed with a slope, which is convenient for complete unloading of rubbish and reduces residue.  
The mobile system adopts full-time four-wheel drive technology, which can move forward stably in complicated terrain such as mountains and muddy roads.  
The operator can manoeuvre the equipment from a certain distance away to improve operational safety.

### Product usage:

In rural mountainous areas, collecting and treating agricultural and forestry wastes and living rubbish to improve the rural environment.  
Used outside large urban event venues, such as concerts, sporting event venues, to quickly clean up event rubbish.

### Product advantages:

Slope design optimises the unloading effect and reduces cleaning costs.  
Full-time four-wheel drive adapts to complex terrain, expanding the service area.  
Wireless remote control ensures the safety of personnel and keeps them away from the danger zone of operation.
