Product Description

Product features:

Adopting self-balancing stabilising system, it adjusts automatically on uneven ground to ensure the equipment running smoothly and prevent tipping.

The compression device of the rubbish bin has an overload protection function, which automatically stops the machine when it encounters hard objects or is overloaded to protect the equipment.

The suspension system of the mobile chassis is specially tuned for good shock absorption to reduce rubbish scattering.

Product usage:

Suitable for temporary rubbish dumps at construction sites to cope with rugged ground and secure rubbish collection.

In farmers' markets, dealing with fruit and vegetable rubbish, meat waste, disinfecting and sterilising to guarantee hygiene.

Used in urban riverside and lakeside parks to prevent rubbish from polluting the water body and maintain the ecology of the waters.

Product advantages:

Self-balancing system improves equipment stability and reduces safety risks.

Overload protection prolongs equipment life and reduces maintenance costs.

Good shock absorption protects rubbish integrity and reduces secondary pollution.
