Product Description

Product features:

Installed with advanced anti-lock braking system (ABS), which prevents the wheels from locking up during emergency braking and ensures vehicle driving stability.

Equipped with the body stability control system (ESC), real-time monitoring of the vehicle driving status, automatic intervention in the event of vehicle skidding and other dangers, to protect driving safety.

A full range of airbags are set up in the cab to provide reliable safety protection for the driver.

Product usage:

Applicable to all kinds of mining transportation operations, whether in the narrow mining roads or steep slopes, can protect the driver's safety.

For nighttime transportation in mines, the safety system ensures safe driving even in poor visibility conditions.

In the special operating environment of mines, such as high altitude and foggy areas, it provides safety for the driver.

Product advantages:

Multi-safety system effectively reduces the risk of accidents and protects the driver's life and the enterprise's property.

Enhance the driver's sense of security, so that he can drive more attentively and improve transportation efficiency.

Meets the strict requirements of mine safety production and provides guarantee for the sustainable development of mining enterprises.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
