Product Description

Product features:

Adopting short wheelbase design, it is able to steer flexibly in narrow mining roads and loading/unloading sites. Equipped with power steering system, the operation is light, reducing the driver's labor intensity and improving driving comfort. The suspension system of the vehicle has been optimized, with good damping effect, which can keep smooth driving on the bumpy mining roads.

Product usage:

Suitable for transportation operations in underground mines, freely shuttling in narrow roadways, transporting ores and equipment.

Used in small open pit mines, the flexible maneuverability enables efficient transportation in limited operating space.

At the temporary operation point of the mine, it is convenient for the vehicle to quickly adjust its position and complete the loading and unloading tasks.

Product advantages:

Short wheelbase and power steering system make the vehicle maneuvering flexible, adapt to complex mine road conditions and improve transportation efficiency.

Good vibration damping effect reduces the wear and tear of vehicle parts, prolongs the service life of the equipment and reduces the maintenance cost.

Enhance the driver's operating experience, reduce labor intensity and improve work motivation.
