Product Description

Product features:

The vehicle is fully equipped with emergency medical equipment, such as defibrillator, cardiac monitor, ventilator, etc., to meet all kinds of emergency needs.
Installed with an efficient ventilation system, it can quickly change the air inside the vehicle to keep the air fresh and reduce the risk of cross-infection.
The spacious and reasonable layout of the medical cabin makes it convenient for the medical staff to carry out all-around treatment operations on the patients during the traveling process.

Product usage:

Used for transferring critically ill patients, such as transferring between different hospitals, to ensure that patients can receive continuous professional treatment during the transfer.
To provide emergency medical assistance to residents in remote areas, to make up for the lack of local medical resources, and to safely transfer patients to hospitals that are in a position to do so.
Standing by at large events to provide timely medical assistance to people who are suddenly unwell at any time.

Product advantages:

Complete medical equipment enhances the ability to rescue and treat patients, and fights for valuable treatment time for patients.

Good ventilation system creates a healthy treatment environment and protects the health of patients and medical staff.

Reasonable layout of the medical cabin is convenient for the operation of the medical staff and improves the treatment efficiency.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
