Product Description

Product features:

The internal space layout of the compartment of the Isuzu refrigerated truck has been carefully optimized, and it adopts foldable shelf design, which can be flexibly adjusted according to the size and shape of the goods and maximize the use of compartment space.

The body is made of lightweight aluminum alloy, which significantly reduces the weight of the whole vehicle and improves the fuel economy while ensuring the strength of the body.

The refrigeration system is equipped with an automatic defrost function, which can monitor the evaporator defrosting situation in real time and defrost the evaporator automatically in time, always keeping the refrigeration efficiency in the best state.

Product usage:

In supermarket distribution, it can flexibly adjust the shelves according to the size and distribution volume of different commodities, and efficiently transport all kinds of refrigerated food, beverages and other goods.

is suitable for e-commerce fresh food distribution, lightweight body with large space compartment, can load more goods at a time, reduce distribution costs.

transports large quantities of fresh fruits and vegetables for fruit and vegetable wholesalers. Automatic defrosting ensures that fruits and vegetables are not affected by frost during long-distance transportation and remain fresh.

Product advantages:

Flexible space layout improves loading efficiency and meets diversified cargo transportation needs.

Lightweight body reduces fuel consumption, improves economic efficiency and meets the concept of environmental protection.

The automatic defrost function ensures stable refrigeration, prolongs the service life of the equipment and reduces the maintenance cost.
