Product Description

Product features:

With good off-road performance, high chassis design and high performance tires, it can adapt to mountainous areas, countryside and other areas with poor road conditions, to ensure that it can reach the rescue site smoothly even under complicated terrain.

Installed with satellite communication equipment, it can keep in touch with the outside world and obtain rescue support and guidance even in remote areas with weak or no signal.

Equipped with field first aid equipment, such as simple surgical instruments, emergency lighting equipment, etc., to meet the needs of first aid in the field environment.

Product usage:

In remote mountainous areas, rescue residents who have sudden illnesses or suffered accidents, overcome terrain difficulties and transfer patients to hospitals.

Provide emergency medical rescue services for wild adventure and outdoor sports enthusiasts, and safeguard their lives in remote areas.

In the rescue work after natural disasters, go deep into the severely affected villages and other areas to carry out rescue operations.

Product advantages:

Off-road performance breaks through the geographical limitations and expands the rescue scope, so that patients in remote areas can also receive timely treatment.

Satellite communication ensures the smooth flow of information, and professional rescue guidance can be obtained even in harsh environments.

The field first aid equipment meets the first aid needs in special environment and improves the rescue ability.

After-sales service

AUTOKING has four overseas branches to develop overseas customers. We also carry out after-sales service guarantee for vehicles.

Is the price cheap?

The price is chosen by comparing several car manufacturers, and we also hope that customers can compare several times and finally choose our company.

Is international logistics guaranteed?

After the purchase of goods are shipped, the company tracks the order in full. Shipping video and transport video we provide for you at any time.
