Product Description

Product features:

Equipped with advanced navigation and route planning system, combined with real-time traffic information, it plans the optimal transportation routes for drivers, avoiding congested roads and saving transportation time.

The refrigeration unit of the refrigerated truck adopts environmentally friendly lubricating oil, which is non-polluting to the environment and can effectively reduce the wear and tear of the unit and prolong its service life.

The compartment adopts static electricity elimination technology, preventing the goods from adsorbing dust and catching fire due to static electricity during transportation, and ensuring the safety of the goods.

Product usage:

Provide efficient transportation solutions for cold chain logistics enterprises, and the navigation system ensures that the goods are delivered on time.

It meets the requirements of environmental protection and is suitable for the cold chain transportation of green food, high-end cosmetics and other goods that have strict standards for environmental protection.

When transporting static-sensitive goods such as electronic components, flammable chemical raw materials, etc., the static elimination technology ensures transportation safety.

Product advantages:

Intelligent navigation improves transportation efficiency and reduces time cost.

Environmentally friendly lubricant conforms to the concept of green development, and extends the life of the unit and reduces maintenance costs.

Static electricity elimination technology eliminates potential safety hazards and protects cargo quality and safety.
