Product Description

Product features:

Equipped with high-precision temperature sensors, the accuracy of monitoring the temperature in the compartment can reach ± 0.5 , ensuring accurate temperature control.

The door of the refrigerated truck adopts electric power to open and close, which is easy to operate and saves labor, and can automatically detect the sealing condition when closing, so as to guarantee the sealing of the truck.

The vehicle adopts lightweight suspension system, which ensures the carrying capacity and improves the driving stability and comfort of the vehicle.

Product usage:

Used for pharmaceutical cold chain transportation, high-precision temperature sensors to ensure that the temperature of drug storage meets the strict requirements.

In the logistics scenario of frequent loading and unloading of goods, the electrically-assisted door improves operational efficiency, and the automatic seal detection function protects the cold chain effect.

Whether on city roads or highways, the lightweight suspension system makes the vehicle run smoothly and reduces cargo bumps.

Product advantages:

High-precision temperature monitoring guarantees cargo quality, especially for temperature-sensitive pharmaceutical products. Electrically-assisted door improves operation convenience and cabin sealing.

Lightweight suspension improves vehicle driving performance and ensures the safety of cargo transportation.
