Product Description

Product features:

Adopting advanced air purification technology and installing high-efficiency air filters in the compartments, it can effectively remove odors, bacteria and viruses and create a clean storage environment for the goods.

The refrigeration system of the refrigerated truck has the function of rapid warming, which can quickly adjust the temperature of the compartment to the appropriate range when it is necessary to transport goods with upper limit requirements on temperature.

The interior of the vehicle is made of fireproof and flame retardant materials, which can guarantee the safety of transportation and prevent the spread of fire even under extreme conditions.

Product usage:

Used for the transportation of air quality sensitive goods such as flowers and high-grade food, to ensure that the goods have pure aroma and uncontaminated quality.

It is suitable for the transportation of some chemical raw materials or electronic components that have special requirements for temperature, which can neither be too low nor too high.

In long-distance cold chain transportation, especially in crowded places or high value of goods, the fireproof interior adds guarantee for transportation safety.

Product advantages:

Air purification technology improves the quality of cargo storage environment and guarantees the quality of cargo.

Rapid warming function expands the types of transported goods and increases the business scope.

Fire-retardant interior reduces the transportation risk and ensures the safety of personnel and cargo.
