## Product Description

### Product features:

The refrigeration unit is equipped with intelligent defrosting function, which does not affect the temperature stability in the compartment during defrosting, ensuring that the goods are always at a suitable storage temperature.  
The interior of Isuzu refrigerated truck adopts humanized design, and there are ramps and handles for easy handling of goods, which reduces the labor intensity of the porters.  
With the emergency rescue call system installed, when the vehicle encounters an unexpected situation, the driver can call for rescue with one key to protect the safety of personnel and goods.

### Product usage:

Used for transportation of biological products and high-end foodstuffs which require very high temperature stability, intelligent defrost function protects the quality of goods.  
In logistics distribution centers and warehouses, the humanized design facilitates cargo loading and unloading and improves operational efficiency.  
Provide safety for long-distance cold chain transportation drivers, and the emergency rescue call system ensures timely help in times of danger.

### Product advantages:

Intelligent defrosting maintains stable temperature and protects cargo quality.  
Humanized design improves operational efficiency and reduces labor cost.  
Emergency rescue call system improves transportation safety and protects personnel and cargo.
