## Product Description

### Product features:

With good low-temperature starting performance, even in the cold winter, it can quickly start the refrigeration unit and vehicle engine to ensure normal cold chain transportation.  
The Isuzu refrigerated truck compartment is equipped with temperature-adjustable shelves, which can adjust the temperature of the shelf area according to the different temperature requirements of the goods and realize zonal temperature control.  
Vehicle driving data recorder is installed to record vehicle driving track, speed, stopping time and other information, which is convenient for management and analysis of the transportation process.

### Product usage:

In the cold northern region, distributing fresh food and medicine for residents in winter, good low-temperature starting performance to protect the supply.  
For pharmaceutical companies to transport drugs with different storage temperature requirements, partitioned temperature-controlled shelves to ensure the quality of drugs.  
Logistics enterprises analyze the transportation efficiency through driving data recorder, optimize the transportation route and vehicle scheduling.

### Product advantages:

Low-temperature starting performance guarantees cold chain transportation in winter and expands business scope.  
Zoned temperature-controlled shelves meet different cargo temperature requirements and improve transportation flexibility.  
Traveling data recorder provides data support for transportation management and improves operation efficiency.
