## Product Description

### Product features:

Adopting double refrigeration unit design, when one unit fails, the other unit can start automatically to continue to maintain the low-temperature environment in the compartment, which protects the safety of goods and improves the reliability of transportation.

Isuzu refrigerated truck compartment adopts modular production process, high degree of standardization of parts and components, easy to repair and replace and shorten the maintenance time.

Tire pressure monitoring system is installed to monitor the tire pressure in real time, which ensures the safety of vehicle driving and prolongs the service life of tires.

### Product usage:

Suitable for high-end food transportation with high requirements for cargo freshness, such as imported seafood, high-grade cheese, etc. Dual units guarantee the cold chain without breaking the chain.

In the peak season of cold chain transportation, even if the vehicle fails, the modular compartments can be quickly repaired without affecting the transportation task.

Provide security for long-distance cold chain transportation vehicles, tire pressure monitoring to ensure driving safety and reduce transportation risks.

### Product advantages:

Dual refrigeration units improve transportation reliability and reduce the risk of cargo loss.

Modularized compartments reduce the difficulty and cost of maintenance and improve vehicle availability.

Tire pressure monitoring ensures driving safety and prolongs the service life of tires.
