Product Description

Product features:

The refrigeration unit has the ability of ultra-low temperature refrigeration, which can reduce the temperature inside the compartment to below -30 to meet the demand of ultra-low temperature transportation of some special cargoes, such as quick-frozen food and special medicines.

Isuzu refrigerated truck compartments have excellent sealing, adopting patented sealing technology, which effectively prevents outside heat and moisture from entering, keeping the low-temperature and dry environment inside the compartment. It is installed with automatic temperature alarm system, which immediately issues an alarm when the temperature inside the compartment exceeds the set range, reminding the driver and management personnel to deal with it in time.

Product usage:

It is used for product transportation of quick-frozen food enterprises to ensure the quality and taste of quick-frozen food. Transportation of special medicines and electronic components sensitive to humidity, good sealing to provide a suitable environment.

In the field of medical research, transportation of biological samples and reagents requiring ultra-low temperature preservation, temperature alarm system to protect the safety of samples.

Product advantages:

Ultra-low temperature refrigeration meets the needs of special cargo and expands the business scope.

Excellent sealing to maintain a stable cryogenic environment and guarantee the quality of cargo.

Temperature alarm system provides timely warning and reduces the risk of cargo loss.
