Product Description

Product features:

Isuzu refrigerated trucks are equipped with advanced navigation and real-time road condition monitoring system, combined with big data analysis, to plan the optimal transportation routes for drivers, avoiding congested roads and saving transportation time.

The carriages are made of high-strength steel to create the skeleton, covered with high-quality fiberglass material, which ensures that the carriages are sturdy and durable, and also have good heat insulation performance.

The refrigeration unit is equipped with a standby power supply, which automatically switches to the standby power supply when the main power supply of the vehicle fails, continuously supplying power to the refrigeration unit to ensure the temperature inside the compartment is stable.

Product usage:

It is suitable for cold chain logistics enterprises with very high requirements on transportation time, such as fresh food e-commerce distribution, and intelligent navigation to ensure timely delivery of goods to customers.

Cold chain transportation in complex road conditions and harsh environments, sturdy compartments to protect the safety of goods, good insulation to maintain a low-temperature environment.

Respond to sudden power failures, such as when transporting in remote areas, the backup power supply ensures that the quality of the goods is not affected.

Product advantages:

Intelligent navigation improves transportation efficiency, meets customer demand for timeliness and enhances enterprise competitiveness.

Sturdy and insulated compartments enhance transportation safety and cold chain effect, and reduce cargo loss.

Backup power supply provides double protection for cold chain transportation, ensuring the safety of goods.
