

1.1L Lubricating Oil Construction Equipment 23.5-25 Tyre Size for Construction Projects

Our Product Introduction

for more products please visit us on commercial-autos.com

Basic Information

- Place of Origin: Henan, China
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

Product Specification

- Traction Speed: 10-15km/h
- Weighing Platform Length: 7m 24m
- Blade Height: 1.1 M
- Ripper: Optional
- Max Aggregate Diameter: 40mm
- Transmission Type: Powershift
- Lubricating Oil: 1.1L
- Hydraulic Cylinder Brand: FAMOUS BRAND
- Highlight: 1.1L construction equipment lubricating oil, lubricating oil for 23.5-25 tyre size, construction machinery oil with warranty

Product Description:

Introducing our latest Construction Machinery product, a powerful and efficient Engineer Apparatus designed to enhance your construction projects. This cutting-edge Building Equipment is equipped with top-of-the-line Engineering Tools to deliver exceptional performance and productivity on the job site.

With a cutting speed ranging from 2.5 to 3.0 S, this Construction Machinery ensures quick and precise cutting for various construction tasks. The high traction speed of 10-15km/h enables smooth and efficient movement around the work site, saving valuable time and increasing productivity.

The heart of this Engineer Apparatus is its robust C9.3 ACERT engine, known for its reliability and superior performance. This powerful engine provides the necessary force to operate the machinery smoothly and efficiently, even in challenging working conditions.

Equipped with a spacious bucket capacity of 4.5 M3, this Building Equipment allows for efficient loading and transporting of materials, making it an indispensable tool for construction projects of any scale. Whether you need to move heavy loads or handle large volumes of materials, this Construction Machinery is up to the task.

When it comes to quality and reliability, this Engineer Apparatus stands out with its hydraulic cylinder brand from a FAMOUS BRAND. The use of high-quality hydraulic components ensures smooth and precise operation, enhancing the overall performance and durability of the machinery.

In conclusion, our Construction Machinery product is a versatile and reliable tool for any construction project. With its cutting-edge features, including a powerful engine, high cutting and traction speeds, spacious bucket capacity, and top-notch hydraulic components, this Engineer Apparatus is designed to meet the demands of modern construction sites. Invest in this premium Building Equipment and experience enhanced efficiency and productivity in your engineering projects.

Features:

Product Name: Construction Machinery

Bucket Capacity: 4.5 M3

Traction Speed: 10-15km/h

Max Aggregate Diameter: 40mm

Weighing Platform Length: 7m 24m

Blade Height: 1.1 M

Technical Parameters:

Engine Type	C9.3 ACERT
Tyre Size	23.5-25
Cutting Speed	2.5-3.0 S
Lubricating Oil	1.1L
Max Aggregate Diameter	40mm
Hydraulic Cylinder Brand	FAMOUS BRAND
Ripper	Optional
Traction Speed	10-15km/h
Blade Height	1.1 M
Plastering Thickness	2-30mm

Applications:

Construction Machinery is a versatile product that finds its application in a variety of scenarios due to its robust features and capabilities. Whether you are an engineer, architect, or involved in construction projects, this machinery from Henan, China, is designed to meet your needs effectively.

For Engineer Apparatus, this construction machinery is an essential tool for various engineering tasks. Its Powershift transmission type ensures smooth operation and efficiency in handling heavy materials and equipment. The C9.3 ACERT engine type provides the necessary power and performance required for demanding engineering projects. The optional ripper feature adds versatility, allowing engineers to tackle different types of terrain with ease.

Architectural Apparatus benefits from the Construction Machinery's reliable performance and durability. The machinery's delivery time of 30-45 working days ensures timely availability for architectural projects that require quick and efficient solutions. With a supply ability of 1,000 units per month, architects can rely on a steady source of this machinery to support their construction needs.

Engineering Tools are incomplete without the Construction Machinery's advanced features. The lubricating oil capacity of 1.1L ensures smooth functioning and longevity of the machinery, making it a reliable companion for various engineering tasks. The machinery's ability to handle a max aggregate diameter of 40mm makes it suitable for a wide range of construction projects, from small-scale developments to large infrastructure undertakings.

In conclusion, the Construction Machinery from Henan, China, with its powerful engine, optional ripper, and efficient transmission type, is a valuable asset for Engineer Apparatus, Architectural Apparatus, and Engineering Tools. Its attributes make it suitable for a diverse range of construction applications, making it a must-have for professionals in the field.
