

610 Mm Track Shoe Width Building Machinery for Smooth and Heavy-Duty Construction 1.1 M Blade Height

Basic Information

• Place of Origin: Henan, China

• Delivery Time: 30-45 working days

• Payment Terms: T/T

• Supply Ability: 1,000 units per month

Product Specification

• Plastering Thickness: 2-30mm

• Tyre Size: 23.5-25

 Hydraulic Tank Capacity: 18L

• Blade Height: 1.1 M

• Weighing Platform 7m 24m

Length:

• Bucket Capacity: 4.5 M3

Cutting Speed: 2.5-3.0 STrack Shoe Width: 610 Mm

Highlight: 610 mm track shoe construction machinery,

heavy-duty construction machinery with 1.1 m

blade

, building machinery for smooth track operation

Product Description:

The Construction Machinery product is a versatile and efficient piece of equipment designed for various construction tasks. This powerful machine is an essential tool for any construction project, providing the necessary support and capabilities to streamline the building process.

One of the key features of this Construction Machinery is its impressive Weighing Platform Length, ranging from 7m to 24m. This wide range allows for greater flexibility and reach, enabling the machine to access different areas of the construction site with ease. Whether working on a small-scale project or a large-scale development, this Construction Machinery can handle it all.

Another important attribute of this product is its Hydraulic Tank Capacity of 18L. The ample capacity of the hydraulic tank ensures smooth and efficient operation of the machine, providing the necessary power and control for various construction tasks. This feature enhances the overall performance and reliability of the Construction Machinery, making it a valuable asset on the construction site.

The Blade Height of this Construction Machinery is 1.1m, allowing for precise and accurate cutting and shaping of construction materials. This feature is essential for achieving high-quality results in construction projects, ensuring that every cut is clean and precise. With this Construction Machinery, builders and contractors can easily achieve the desired outcomes with precision and accuracy.

When it comes to maintenance and lubrication, the Construction Machinery product is equipped with a Lubricating Oil capacity of 1.1L. Proper lubrication is crucial for the smooth operation and longevity of the machine, and this Construction Machinery ensures that it is well-maintained and ready for use at all times. With the right amount of lubricating oil, the machine can perform optimally and efficiently, reducing downtime and maintenance costs.

Additionally, the Construction Machinery product offers a Plastering Thickness range of 2-30mm, making it suitable for a wide range of plastering applications. Whether applying plaster to walls, ceilings, or other surfaces, this machine can handle various thickness levels with ease and precision. This versatility makes the Construction Machinery a valuable tool for plastering tasks in architectural projects. In conclusion, the Construction Machinery product is a reliable and efficient piece of equipment that is essential for any construction project. With its impressive features such as the Weighing Platform Length, Hydraulic Tank Capacity, Blade Height, Lubricating Oil capacity, and Plastering Thickness range, this machine is well-equipped to handle a variety of construction tasks with precision and ease. Whether used for cutting, shaping, or plastering, this Construction Machinery is a valuable asset for builders, contractors, and construction professionals in need of high-quality architectural apparatus and construction tools.

Features:

Product Name: Construction Machinery
Hydraulic Cylinder Brand: FAMOUS BRAND

Blade Height: 1.1 M
Track Shoe Width: 610 Mm
Cutting Speed: 2.5-3.0 S
Transmission Type: Powershift

Technical Parameters:

Ripper	Optional
Engine Type	C9.3 ACERT
Traction Speed	10-15km/h
Bucket Capacity	4.5 M3
Lubricating Oil	1.1L
Hydraulic Cylinder Brand	FAMOUS BRAND
Plastering Thickness	2-30mm
Track Shoe Width	610 Mm
Weighing Platform Length	7m 24m
Transmission Type	Powershift

Applications:

Construction machinery is an essential component in various architectural apparatus and construction tools. With its diverse range of _ _ _ applications, this machinery plays a significant role in the construction industry. Originating from Henan, China, this product boasts a delivery time of 30-45 working days, making it a reliable choice for construction projects with tight schedules.

When it comes to payment terms, this construction machinery product offers the flexibility of T/T, ensuring a convenient transaction process for customers. With a remarkable supply ability of 1,000 units per month, this product is readily available to meet the demands of construction projects of all sizes.

Equipped with a hydraulic cylinder from a famous brand, this construction machinery product ensures optimal performance and durability. The track shoe width of 610mm provides stability and maneuverability on various terrains, making it suitable for different construction scenarios.

The transmission type of this machinery is powershift, offering smooth and efficient operation on the construction site. With a lubricating oil capacity of 1.1L, maintenance is made easy, ensuring the longevity of the machinery.

Whether it's for plastering thickness ranging from 2-30mm or other construction applications, this machinery product is designed to deliver reliable performance. Its versatility and robust design make it a valuable asset for building machinery used in a wide range of construction projects.
