

Plastering Thickness 2-30mm Engineering Tools with 4.5 M3 Bucket Capacity Smooth and Precise Work

Our Product Introduction

Basic Information

- Place of Origin: Henan, China
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

**Plastering Thickness 2-30mm
Engineering Tools
4.5 M3 Bucket Capacity
Smooth and Precise Work**

Product Specification

- Lubricating Oil: 1.1L
- Max Aggregate Diameter: 40mm
- Hydraulic Cylinder Brand: FAMOUS BRAND
- Blade Height: 1.1 M
- Ripper: Optional
- Traction Speed: 10-15km/h
- Track Shoe Width: 610 Mm
- Engine Type: C9.3 ACERT
- Highlight: plastering tool with 4.5 m3 bucket,
engineering tools for smooth plastering,
precise plastering thickness 2-30mm

Product Description:

Introducing our top-of-the-line Construction Machinery, a powerful and reliable piece of equipment designed to meet the demands of the construction industry. This versatile machinery is essential for any construction project, offering superior performance and efficiency. One of the standout features of our Construction Machinery is its impressive Hydraulic Tank Capacity of 18L. This ensures that the machinery can operate efficiently for extended periods without the need for frequent refills, making it a valuable asset on any construction site.

For added versatility, the Construction Machinery comes with an optional Ripper attachment. This allows users to customize the machinery to suit different tasks and applications, making it a truly versatile tool in the world of construction.

When it comes to reliability, the Construction Machinery does not disappoint. The hydraulic system is equipped with a FAMOUS BRAND Hydraulic Cylinder, known for its durability and performance. This ensures smooth and efficient operation, even under the most demanding conditions.

Another key feature of our Construction Machinery is its efficient lubrication system. With a Lubricating Oil capacity of 1.1L, the machinery is well-equipped to withstand the rigors of daily use and maintain optimal performance over time. This helps to extend the lifespan of the machinery and reduce maintenance requirements, saving both time and money in the long run.

The Construction Machinery is also equipped with a reliable Powershift Transmission Type, ensuring seamless gear shifting and smooth operation. This feature enhances the overall performance of the machinery, making it easier to operate and more efficient in completing construction tasks.

Whether you are a seasoned professional or a novice in the construction industry, our Construction Machinery is the perfect tool to help you get the job done. From digging and lifting to hauling and grading, this engineer apparatus is designed to handle a wide range of construction tasks with ease and precision.

Invest in our Construction Machinery today and experience the difference it can make in your construction projects. With its powerful performance, durable construction, and versatile features, this construction apparatus is sure to become an invaluable asset in your toolkit. Trust in the reliability and efficiency of our Construction Machinery to take your construction projects to the next level.

Features:

Product Name: Construction Machinery -----

Ripper: Optional

Cutting Speed: 2.5-3.0 S

Weighing Platform Length: 7m 24m

Track Shoe Width: 610 Mm

Tyre Size: 23.5-25

Technical Parameters:

Engine Type -----	C9.3 ACERT -----
Traction Speed	10-15km/h
Plastering Thickness	2-30mm
Hydraulic Tank Capacity	18L
Bucket Capacity	4.5 M3
Blade Height	1.1 M
Tyre Size	23.5-25
Track Shoe Width	610 Mm
Lubricating Oil	1.1L
Weighing Platform Length	7m 24m

Applications:

Construction Machinery from Henan, China is a versatile and essential product for various construction projects. With a delivery time of 30-45 working days, this equipment is ideal for fulfilling urgent construction needs. The payment terms for this Construction Apparatus are flexible, allowing for easy transactions through T/T.

With a supply ability of 1,000 units per month, this Engineer Apparatus is readily available to meet the demands of construction businesses of all sizes. The Tyre Size of 23.5-25 ensures stability and durability on different terrains, making it suitable for a wide range of Building Machinery applications.

The Track Shoe Width of 610 mm provides excellent traction and maneuverability, essential for navigating construction sites efficiently.

The 1.1L Lubricating Oil capacity ensures smooth operation and maintenance of this Construction Machinery, enhancing its longevity and performance.

Equipped with a Bucket Capacity of 4.5 m3, this product is capable of handling large quantities of materials, making it a valuable asset for earthmoving and excavation tasks. The Hydraulic Tank Capacity of 18L ensures optimal hydraulic system performance, enhancing the overall efficiency of this Engineer Apparatus.
