

C9.3 ACERT Engine Construction Machinery 1.1L Lubricating Oil 10-15km/h Traction Speed Perfect for Heavy Duty Projects

Our Product Introduction

for more products please visit us on commercial-autos.com

Basic Information

- Place of Origin: Henan, China
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

Product Specification

- Engine Type: C9.3 ACERT
- Track Shoe Width: 610 Mm
- Hydraulic Cylinder Brand: FAMOUS BRAND
- Weighing Platform Length: 7m 24m
- Blade Height: 1.1 M
- Max Aggregate Diameter: 40mm
- Ripper: Optional
- Tyre Size: 23.5-25
- Highlight: **C9.3 ACERT construction engine, 1.1L lubricating oil machinery, 10-15km/h traction speed equipment**

Product Description:

Introducing our top-of-the-line Construction Machinery, a robust and efficient piece of building equipment designed to streamline construction processes and enhance productivity on the job site. This engineer apparatus is equipped with powerful features and specifications to meet the demands of various construction projects, making it an essential addition to any construction fleet. At the heart of this Building Machinery is the advanced C9.3 ACERT engine, known for its reliability, durability, and superior performance. This engine type ensures optimal power delivery, fuel efficiency, and low emissions, making it ideal for heavy-duty construction applications.

One of the key features of this Construction Machinery is its impressive Max Aggregate Diameter capacity of 40mm, allowing it to effectively handle a wide range of construction materials with ease. Whether you are working with concrete, gravel, or other aggregates, this machinery can efficiently process and transport them on the job site.

With a generous Bucket Capacity of 4.5 M3, this Building Machinery offers ample space to carry and transport materials, reducing the need for frequent refills and increasing overall efficiency. The large bucket size enables quick and efficient loading and unloading, saving valuable time and labor costs.

When it comes to performance, this Construction Machinery excels with its Cutting Speed of 2.5-3.0 S, allowing for swift and precise cutting of materials on the job site. Whether you are shaping terrain, clearing land, or performing other cutting tasks, this machinery delivers consistent and reliable performance to help you meet project deadlines.

Additionally, the Blade Height of 1.1 M provides enhanced versatility and precision during operation, allowing you to adjust the blade height to suit different job requirements. This feature ensures optimal cutting depth and accuracy, resulting in high-quality workmanship and superior finished results.

In conclusion, our Construction Machinery is a cutting-edge solution for construction professionals seeking reliable, efficient, and high-performance equipment for their projects. With its powerful engine, impressive capacity, fast cutting speed, and adjustable blade height, this Building Machinery is designed to optimize productivity and deliver exceptional results on the job site. Invest in this top-of-the-line equipment today and experience the difference it makes in your construction operations.

Features:

Product Name: Construction Machinery -----

Transmission Type: Powershift

Plastering Thickness: 2-30mm

Cutting Speed: 2.5-3.0 S

Bucket Capacity: 4.5 M3

Lubricating Oil: 1.1L

Technical Parameters:

Max Aggregate Diameter	40mm
Engine Type	C9.3 ACERT
Track Shoe Width	610mm
Hydraulic Cylinder Brand	FAMOUS BRAND
Weighing Platform Length	7m 24m
Hydraulic Tank Capacity	18L
Blade Height	1.1m
Bucket Capacity	4.5m3
Plastering Thickness	2-30mm
Cutting Speed	2.5-3.0 S

Applications:

When it comes to building projects, having reliable construction machinery is essential for ensuring efficiency and quality. Our Construction Machinery product, originating from Henan, China, is designed to meet the demands of various construction scenarios with its robust features and specifications.

One of the key application occasions for our Construction Machinery is in large-scale construction projects such as building high-rise structures, bridges, and roads. The machinery's high Supply Ability of 1,000 units per month ensures that construction companies can rely on a steady and consistent source of equipment to meet project deadlines.

In scenarios where precise measurements are crucial, our Construction Machinery's Weighing Platform Length of 7m to 24m comes in handy. This feature allows for accurate material handling and distribution, making it suitable for tasks that require meticulous planning and execution.

For tasks such as plastering and concrete work, the Plastering Thickness range of 2-30mm ensures versatility and adaptability to different construction needs. Whether it's applying finishing touches to a building or working on intricate details, our machinery provides the necessary precision and control.

When it comes to mobility and speed, our Construction Machinery offers reliable performance with a Traction Speed of 10-15km/h and

Tyre Size of 23.5-25. This makes it ideal for construction sites that require frequent relocation of equipment and efficient maneuvering in challenging terrains.

Moreover, the Bucket Capacity of 4.5 M3 enables our machinery to handle heavy loads and materials with ease, making it a valuable asset in scenarios that involve extensive earthmoving and material transport.

With a Delivery Time of 30-45 working days and Payment Terms of T/T, our Construction Machinery ensures timely delivery and convenient payment options for customers, further enhancing the overall user experience.

In conclusion, our Construction Machinery is a versatile and reliable solution for a wide range of construction applications, offering efficiency, precision, and durability in various building equipment scenarios. Whether it's for construction apparatus, construction devices, or other building projects, our machinery is designed to meet the demands of modern construction requirements.
