

Optional Ripper Construction Apparatus for Heavy-Duty Work Tyre Size 23.5-25

Our Product Introduction

for more products please visit us on commercial-autos.com

Basic Information

- Place of Origin: Henan, China
- Delivery Time: 30-45 working days
- Payment Terms: T/T
- Supply Ability: 1,000 units per month

Product Specification

- Max Aggregate Diameter: 40mm
- Ripper: Optional
- Traction Speed: 10-15km/h
- Bucket Capacity: 4.5 M3
- Transmission Type: Powershift
- Tyre Size: 23.5-25
- Engine Type: C9.3 ACERT
- Blade Height: 1.1 M
- Highlight: heavy-duty construction ripper ,
23.5-25 tyre ripper apparatus ,
construction machinery ripper attachment

Product Description

Product Description:

Discover the ultimate solution for all your construction needs with our top-of-the-line Construction Machinery product. Designed to meet the demands of the most challenging construction projects, this powerful equipment combines cutting-edge technology with durability and efficiency.

Equipped with a range of advanced features, our Construction Machinery is the perfect choice for professionals in the construction industry. Whether you are working on a large-scale project or a smaller job, this versatile machine will help you get the job done quickly and effectively.

One of the key features of our Construction Machinery is the optional ripper, providing you with added versatility and efficiency on the job site. The ripper allows you to tackle tough terrain and break through hard surfaces with ease, making it an essential tool for any construction project.

With a bucket capacity of 4.5 M3, our Construction Machinery offers ample space for transporting materials and debris, increasing your productivity and reducing downtime. This large capacity bucket ensures that you can handle large loads with ease, making it an indispensable tool for any construction project.

The Powershift transmission type of our Construction Machinery ensures smooth and efficient operation, allowing you to shift gears seamlessly and maintain control over the machine at all times. This advanced transmission system enhances performance and productivity, enabling you to work more efficiently and effectively on the job site.

When it comes to stability and traction, our Construction Machinery excels with a track shoe width of 610 mm. The wide track shoes provide superior grip and stability on various terrains, ensuring that you can maneuver the machine with precision and confidence. This feature is especially beneficial when working in challenging conditions or uneven surfaces.

For increased accuracy and convenience, our Construction Machinery features a weighing platform with a length ranging from 7m to 24m. This spacious platform allows you to accurately measure and monitor materials and loads, ensuring that you can maintain control over your operations and optimize efficiency. Whether you are weighing materials for transport or monitoring payloads, this weighing platform is an essential tool for any construction project.

In conclusion, our Construction Machinery is a reliable and efficient choice for professionals in the construction industry. With its advanced features, durable construction, and high-performance capabilities, this machine is the perfect companion for all your engineering tasks. From large-scale projects to smaller jobs, our Construction Machinery will help you tackle any challenge with ease and precision. Invest in this top-quality equipment today and experience the power of innovative engineering tools in action.

Features:

Product Name: Construction Machinery-----

Max Aggregate Diameter: 40mm

Cutting Speed: 2.5-3.0 S

Hydraulic Cylinder Brand: FAMOUS BRAND

Track Shoe Width: 610 Mm

Traction Speed: 10-15km/h

Technical Parameters:

Engine Type-----	C9.3 ACERT-----
Track Shoe Width	610 mm
Traction Speed	10-15 km/h
Bucket Capacity	4.5 m3
Weighing Platform Length	7m 24m
Max Aggregate Diameter	40mm
Ripper	Optional
Hydraulic Tank Capacity	18L
Cutting Speed	2.5-3.0 s
Transmission Type	Powershift

Applications:

Construction Machinery is a vital tool in the construction industry, serving various purposes in different scenarios. With its Place of Origin in Henan, China, this product guarantees quality and reliability. The Delivery Time of 30-45 working days ensures that construction projects stay on schedule.

Payment Terms of T/T make it convenient for customers to make transactions, while the Supply Ability of 1,000 units per month ensures a steady availability of this essential Building Equipment. The use of 1.1L of Lubricating Oil ensures smooth operation and longevity of the machinery.

Equipped with Hydraulic Cylinder Brand from a FAMOUS BRAND, this Construction Apparatus offers superior performance and durability. The Weighing Platform Length ranging from 7m to 24m provides versatility in different construction scenarios, accommodating various project requirements.

With a Max Aggregate Diameter of 40mm, this Building Machinery can handle a wide range of materials, making it suitable for different construction tasks. The Plastering Thickness of 2-30mm allows for precise and efficient plastering, ensuring a high-quality finish. Overall, the Construction Machinery product is ideal for a wide range of construction applications, including building foundations, roads, bridges, and more. Its durability, performance, and versatility make it a valuable asset for construction companies and contractors.
